

A Veteran Owned Small Business

About Us

Coastal Engineering is a Veteran Owned Small Business (VOSB) with a staff of professional engineers licensed in multiple states and certified commercial divers, providing marine engineering, repair, and underwater inspection services.

Underwater Inspection & Repairs

All inspection work is performed under the direct supervision of registered professional engineers. Coastal Engineering team leaders have completed the NHI Safety Inspection of In-Service Bridges and Association of Dam Safety courses, as well as other specialty training. We provide professional, reliable, and cost effective options to inspect and repair underwater infrastructure, such as:

- Bridges (Level I, II & III)
- Bulkheads
- Piers
- Power Plants
- Ports & Terminals
- Pipelines & Power Cables
- Locks & Dams
- Storage Tanks
- Tunnels & Culverts
- Shipping Industry
- Confined Spaces
- Water Treatment Facilities
